AMERICAN LINER SYSTEMS

ABOUT US

Environmental Lining / Fertilizer Containments / Vapor Barriers / Fuel Storage Containment / Manure Storage / Fabrication & Installation / Repairs

PROTECTING TOMORROW'S ENVIRONMENT, TODAY!

MINORITY OWNED & ENVIRONMENTALLY FRIENDLY BUSINESS FOCUSED ON GOING PAPERLESS

American Liner Systems, LLC provides the preferred containment solution for bulk storage applications. By implementing our HDPE line products, we offer containment solutions for: chemical, oil, gas, fertilizer, pesticide, brine water storage and other various material and industry specific applications. American Liner Systems, LLC geosynthetics and geomembrane product lines provide resistance to different types of liquids, chemicals and gasses.

At American Liner Systems, LLC, we embrace an "Outside the Box" thought process, leveraging our extensive experience to generate new ideas and concepts that surpass conventional boundaries, ensuring we meet and exceed our customer's special requirements. We offer Agriculture Lining Systems, Barriers such as Spill Containment and Vapor Blocks, Industrial Installations & Fabrications pertaining to the Oil & Gas industry, and so much more.

American Liner Systems, LLC specializes in delivering tailored geosynthetic installation and fabrication solutions for a wide range of agricultural needs, whether you're working on the farm, inside the barn, or out in the field.

WHAT WE CAN DO

- **Press Pits: Our installations are designed to withstand heavy-duty machinery and provide reliable containment.**
- **Machinery Catch Basins: Protect your workspace from spills and leaks with our durable catch basin solutions.**
- **Fly Ash Containment: Ensure the safe storage and disposal of fly ash with our robust containment systems.**
- **Fuel and Chemical Storage: We offer secure storage solutions for fuels and chemicals, meeting the highest safety standards.**
- **Scrap Tunnels: Our fabrication and installation services are ideal for scrap handling and containment.**
- **Equipment Wash Pads: Maintain a clean and environmentally responsible workspace with our wash pad installations.**
- **New Construction: We contribute to the success of new construction projects by providing essential geosynthetic solutions.**
- **Vapor Barriers: Protect structures from moisture and contaminants with our effective vapor barrier systems.**
- **Water Reclamation Systems: Our expertise extends to water management, helping you reclaim and recycle resources responsibly.**

WE SPECIALIZE IN ENVIRONMENTAL LINING AND CONTAINMENT: CREATING CUSTOMIZED SOLUTIONS TO SAFEGUARD THE ENVIRONMENT AND ENSURE CONTAINMENT INTEGRITY.

OIL & GAS
LINING SYSTEMS

Environmental Lining / Fertilizer Containments / Vapor Barriers / Fuel Storage Containment / Manure Storage / Fabrication & Installation / Repairs

PROTECTING TOMORROW'S ENVIRONMENT, TODAY!

American Liner Systems, LLC provides smaller containment systems that are similar to our bulk storage systems but are specific to the oil and gas industries. These smaller systems can be provided as a permanent or a portable unit. American Liner Systems, LLC utilizes HDPE products to provide specific containment per your specific needs.

The snap on well head containment application provided by American Liner Systems, LLC is an example of our custom fabrication. The snap on well head is a prefabricated containment system that matches the existing (in the field) well head casings. These systems are shipped from our facility to the customer's specified locations where they are installed by their field personnel.

American Liner Systems, LLC shop containment pans are fabricated per order and shipped directly to the customer. The shop containment pan can be used for drum storage & oil drip pans, in and under equipment. These products are UV stable and resistant to most chemicals and petroleum products.

BARRIERS

VAPOR BLOCKS &
SPILL CONTAINMENT

Environmental Lining / Fertilizer Containments / Vapor Barriers / Fuel Storage Containment / Manure Storage / Fabrication & Installation / Repairs

PROTECTING TOMORROW'S ENVIRONMENT, TODAY!

SPILL CONTAINMENT

Our flagship product, the Portable Dyke, sets the industry standard for quick assembly, requiring just minutes to set up by effortlessly inserting support brackets into sidewalls. These support brackets are not only easy to install but also seamlessly removable. For ultimate convenience, our premier one-piece unit, the Pop-Up Berm, boasts pop-up sidewalls that eliminate the need for any assembly.

Both the Portable Dyke and Pop-Up Berm are available in a variety of materials known for their UV and chemical resistance, flexibility, lightweight design, and exceptional durability. Enhance your spill containment setup with optional accessories, including a ground cover that shields against ground punctures, a track guard for protection against tire abrasion, and more.

VAPOR BLOCKS

A recent testament to our capabilities involves the provision and installation of Vapor Block Plus 20mil at a construction site situated over a decommissioned fuel station, marking the foundation of a professional office building. This particular application was beneath a concrete slab, showcasing the versatility of our solutions. Notably, both Vapor Block and Vapor Block Plus not only meet but exceed ASTM E-1745 class A, B, and C requirements, ensuring the highest standards of performance and safety.
